

# Euroregio-BNAM 2022 Conference

Contributing to the success of the 2022 Euroregio Baltic Nordic Meeting

May 12th, 2022 - Copenhagen, Denmark

From 9<sup>th</sup> to 11<sup>th</sup> May, the Euroregio Baltic Nordic Meeting was held in Aalborg, Denmark with 90 papers and 170 participants all in one physical location. As well as being on the conference's Scientific Committee, Douglas Manvell, founder of DMdB, chaired a very interesting session on environmental noise and contributed with a presentation on the Developments in International Guidance and Standards for Environmental Noise Assessment.

Douglas Manvell states *"this was a great occasion to, after a long hiatus, meet up with old friends, see solutions in real life, hear of new developments, and make new acquaintances. And to share experiences and information. It did not disappoint."*

The presentation outlined the development of the International Organization for Standardization (ISO) standard ISO 1996 on environmental noise assessment, first published in 1971, and related standards, all published to support and promote good practice. It gave an overview and some insight into projects currently in progress, and gave a taster of future standardization work. This paper, further developed, will be published as part of the coming Internoise 2022 proceedings.

This year's Baltic Nordic-Acoustic Meeting organized biannually since 1954 by the Nordic Acoustic Association was merged with the Euroregio conference organized by the European Acoustics Association.

For more information on the conference, see <https://bnam2022.org/>. For more information about environmental noise standards or what services DMdB can provide, get in touch with DMdB:
