

Danish Sound Cluster – an exciting development

DMdB has just participated in the inaugural meeting of the Environmental Sound Solutions working group

April 23rd, 2021 - Copenhagen, Denmark

DMdB has just participated in the inaugural meeting of Danish Sound Cluster's Environmental Sound Solutions working group together with a number of noise control researchers and industry representatives.

Denmark is a globally recognized hub for sound – capable of hosting, developing, and retaining a diverse and complex landscape of innovative companies and skillsets. Start-ups, world-renowned brands, and highly advanced sound labs have all made their home here because of a unique culture of sound innovation. Danish Sound Cluster is an industry cluster, established in 2009 with the aim of connecting start-ups, established companies and knowledge institutions within the Danish Sound industry. And branding the Danish Sound Ecosystem outside Denmark.

The working group advises Danish Sound Cluster on themes and contributors for webinars and meetings including Sound Day 2021 as well as suggesting collaborative projects to progress the organization's goals. DMdB is looking forward to participating and to the fruits of this work.

DMdB offers noise & vibration control advice and services to solution suppliers and application specialists to provide insight and quality assurance in a manner that makes business sense. DMdB's world-class insight in applications, regulations and solutions is based on extensive knowledge and experience, and a unique position in international standardization and product knowledge.
