

# Predictor & LimA Product Training in UAE

DMdB helping Envirozone make quality noise maps

January 22<sup>nd</sup>, 2024 - Copenhagen, Denmark

DMdB's director, Douglas Manvell, has recently returned from a very successful, intensive and extensive multi-day training of Envirozone in Abu Dhabi on using the Predictor-LimA software from Softnoise with the aim of developing strategic environmental noise maps of a range of noise sources, utilising data from a network of noise monitoring terminals to help build, calibrate and improve the results.

Gipi Gopinathen, Project Manager at Envirozone, explained the background for the training. *"We wanted to ensure that we got the most out of our investment in Predictor-LimA by training our in-house noise management staff. We are very satisfied with the training provided by DMdB"*.

DMdB's director, Douglas Manvell adds *"The many onsite and online Envirozone attendees were attentive and inquisitive. In addition to learning how to use the software, they also gained valuable insight into theory and best practice to ensure result quality while remaining efficient."*

Envirozone is an environmental company providing state-of-the-art solutions for environmental monitoring in air quality, noise, vibration, water quality, environmental compliance, process monitoring/optimization, and emissions testing applications. Envirozone consultancy is ISO 17025 accredited for environmental testing services in the region.

DMdB offers noise & vibration control advice and services to solution suppliers and application specialists to provide insight and quality assurance, based on DMdB's world-class insight in applications, regulations and solutions, in a manner that makes business sense.
